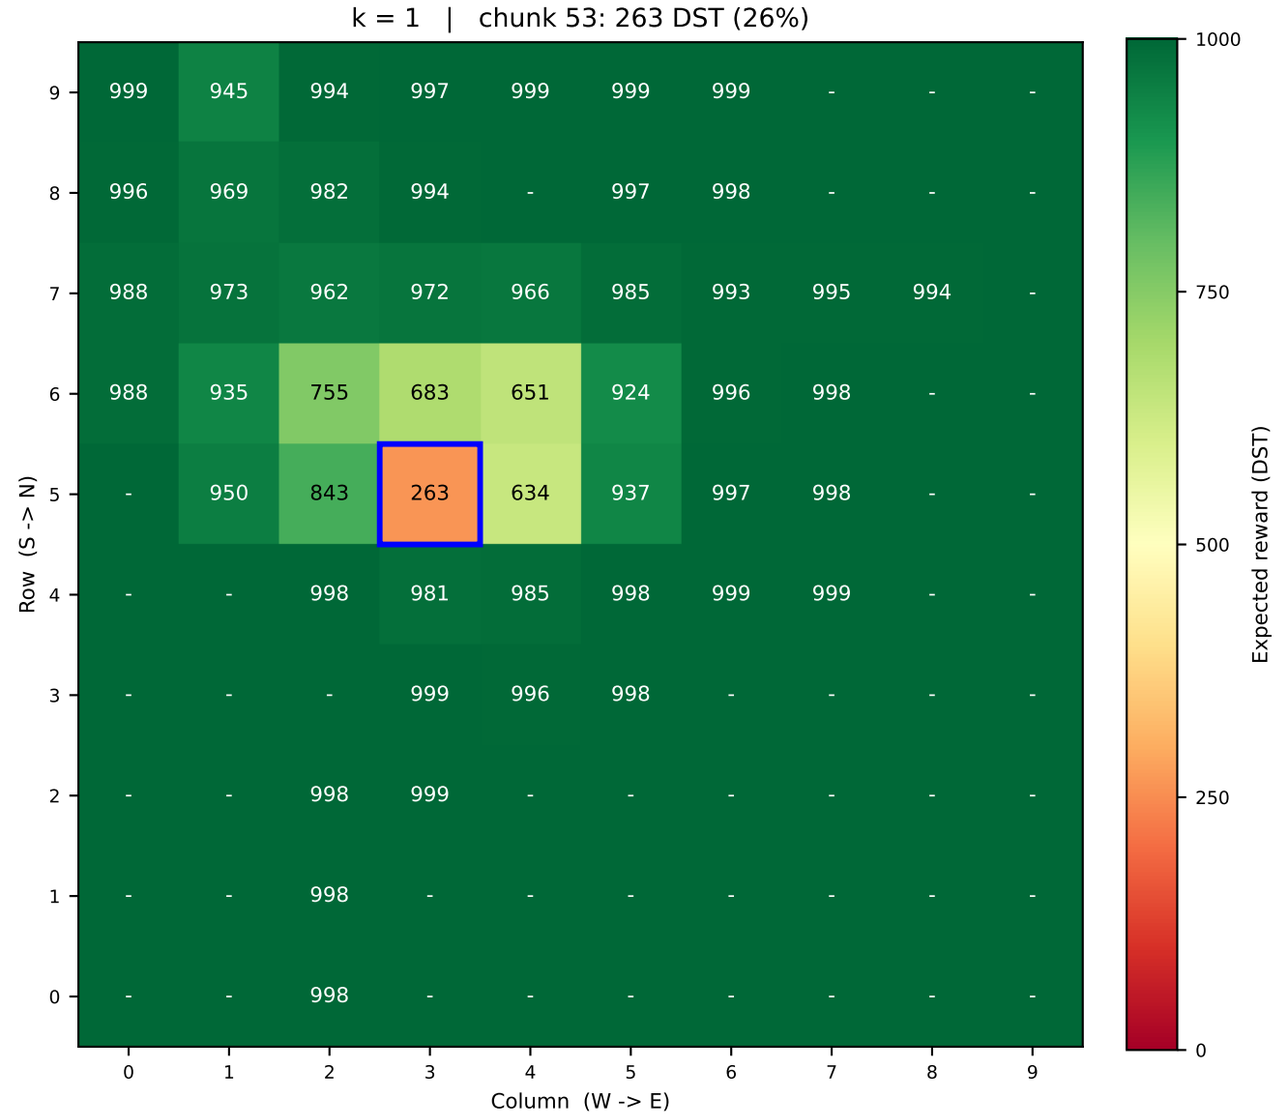
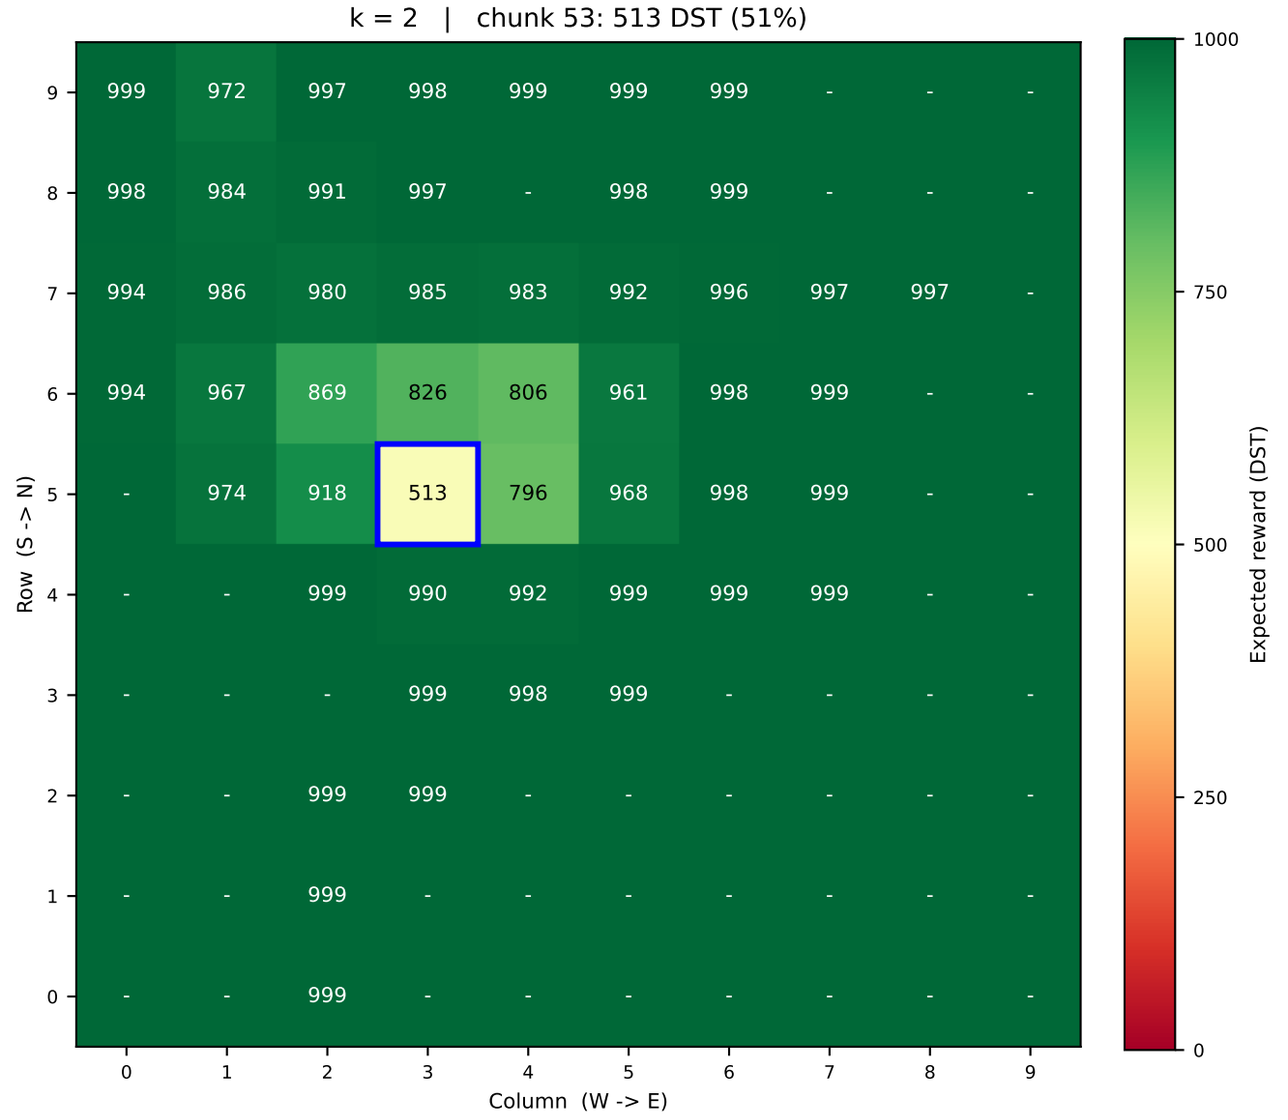
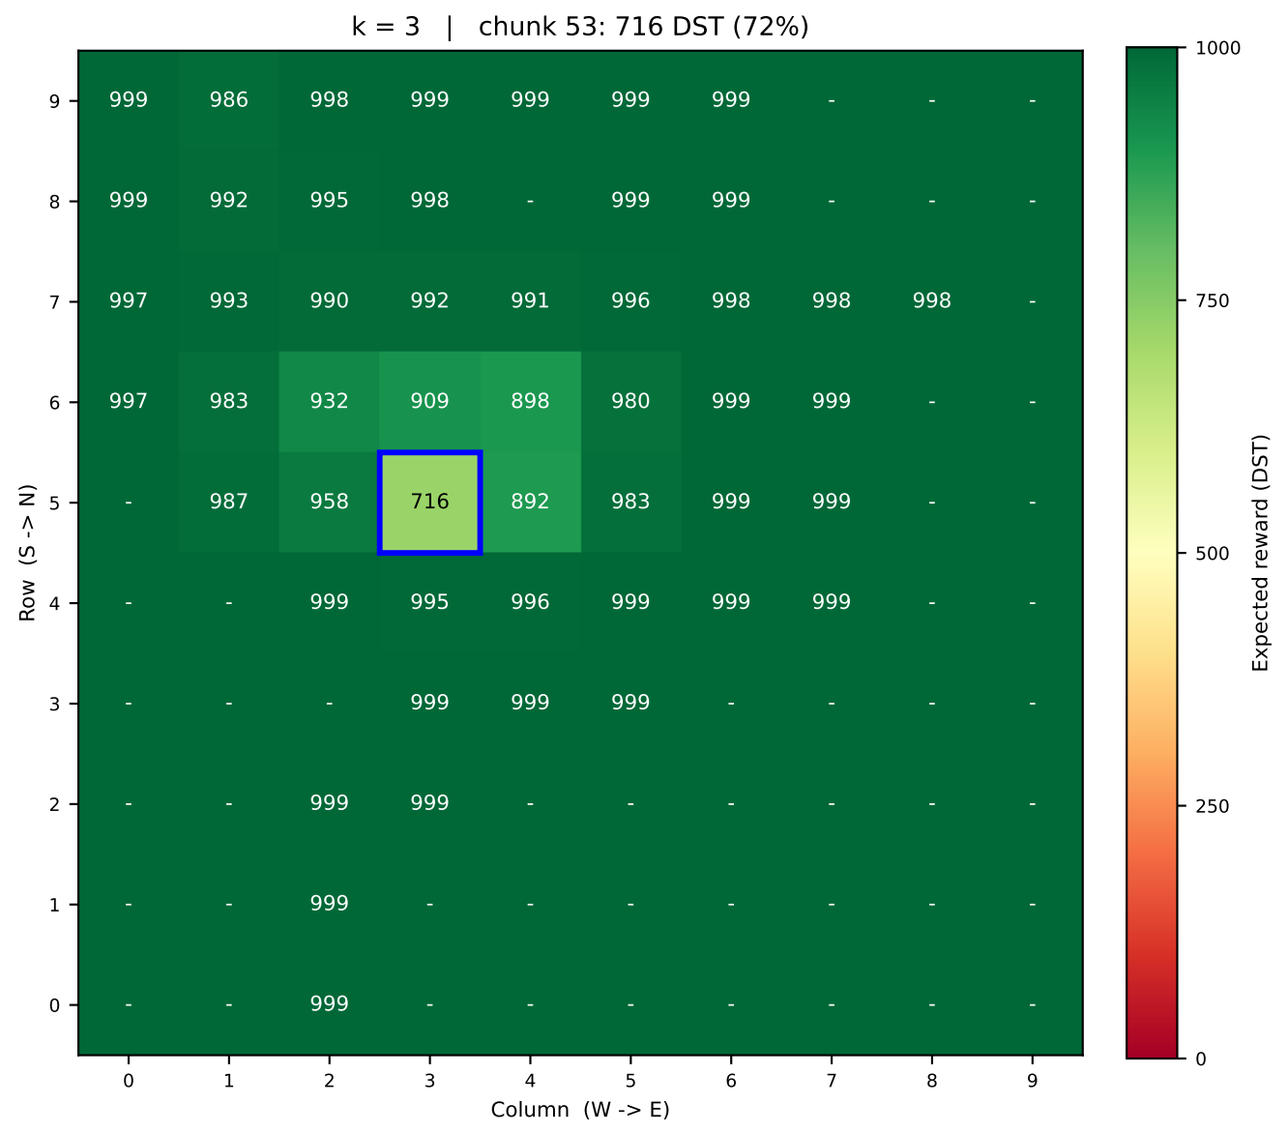
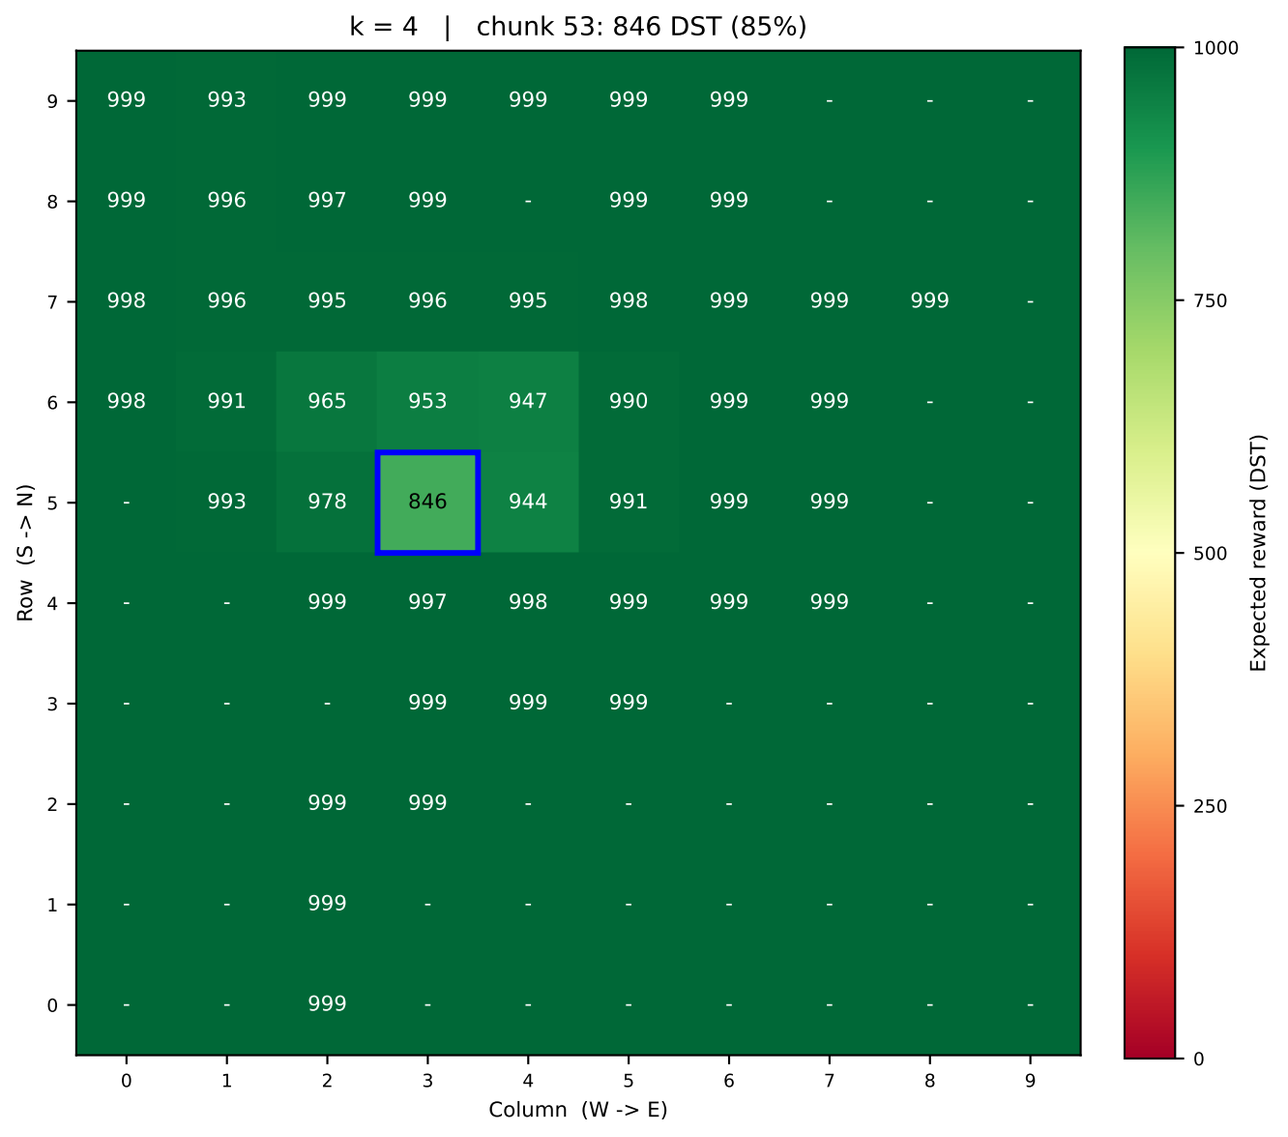
Expected reward for next CID - N = 1000 senders

$r = 1000 \cdot (1-\alpha)^{1/2^k}$ (Eq. 2.4) | most saturated: chunk 53 ($\alpha = 0.931$)









Blue border = most saturated chunk (chunk 53, alpha = 0.931). '-' = cold chunk (0 CIDs, reward always 1000 DST).
